

3-Step to start

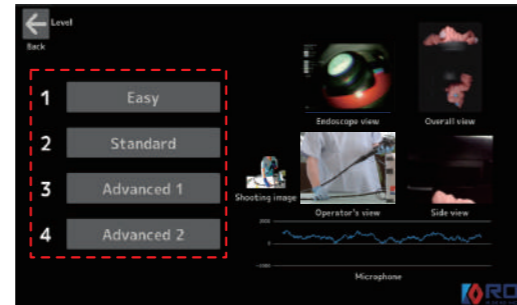

The Next Generation Medical Simulator "mikoto" Colonoscopy Model

1st STEP

Please press the "Start Training".

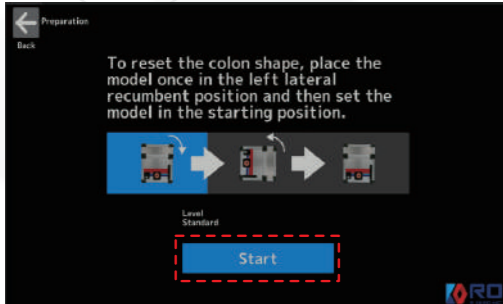

2nd STEP

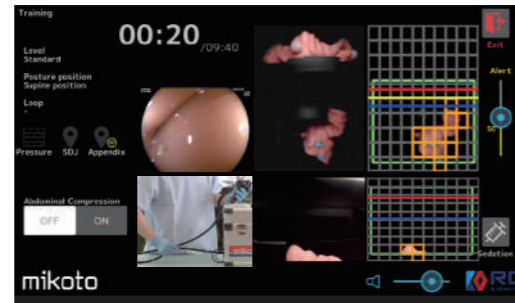

Select one of the difficulty levels from 1 to 4.

Please try it.

3rd STEP

After reset the colon shape, press the "Start".

Training start screen

Elapsed time of observation

Enter the number of polyps observed

Specification

- Size and weight : W417 × D290 × H327 mm, 8.7kg
- Power : Input AC 100-240V 50-60Hz 1.4A MAX
- Basic internal PC software : Linux-base
- Wireless LAN : IEEE802.11b, IEEE802.11g, IEEE802.11n, IEEE802.11ac (2.4GHz band/ 5GHz band)
- Operating temperature/ humidity : 10-40°C / 40°C or less and 85%RH or less
- Storage temperature/ humidity : -20-60°C / 5-95% (Do not use in condensation conditions.)

Product details

R ZERO Inc. 2-218, kamo-cho, Yonago-shi, Tottori, JAPAN

Expertly Crafted Organ Model

Easy to handle

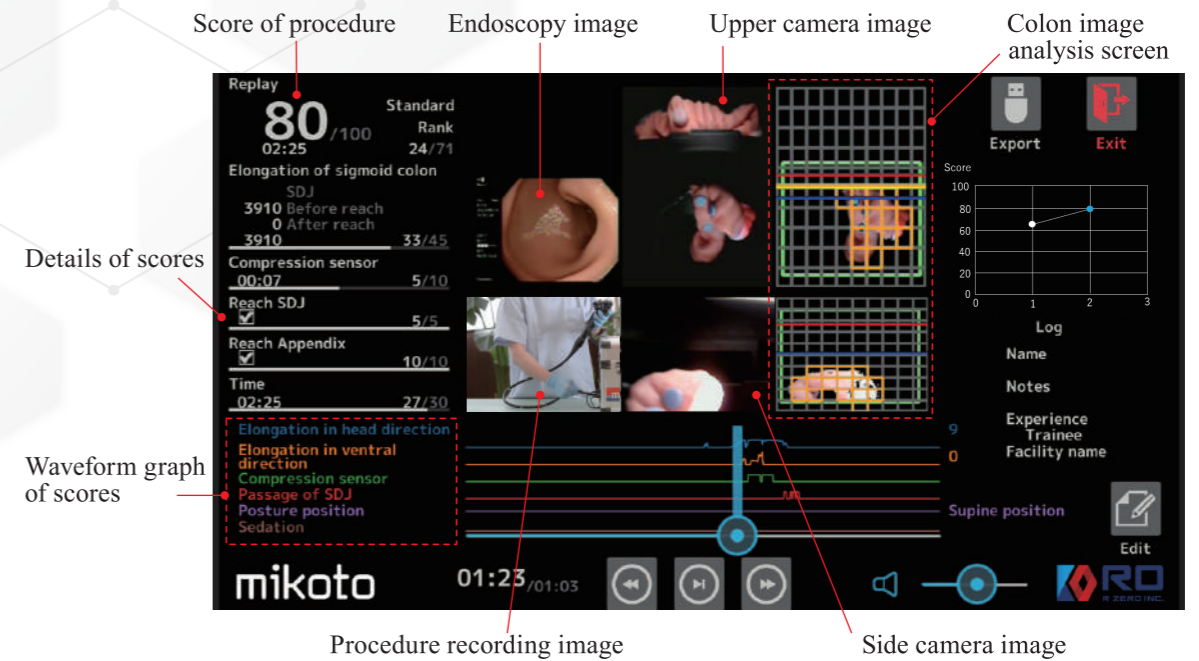

- Light weight (8.7kg)
- Compact size (W417mm×D290mm×H327mm)

Evaluation by Original Algorithm

Functions

Colonoscopy techniques are displayed in the scores. All procedures are recorded for self-learning.

Easy maintenance

- No need to clean-up after use
- Easy replacement of colon models

4 levels of difficulty

Difficulty adjustment mechanism (3-step movement)

Abdominal pressure plate (2-step movement)

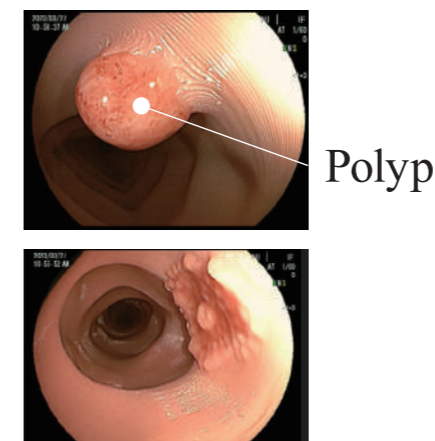

Automatic colon model setup

Easy to use

- ALL-in-one
- 3 minutes to set up
- Build-in touch panel display

Realistic interior modeling

Differences in scores between advanced and beginner endoscopists using mikoto.
